Santosh Bhat

Electronic, Communication and Information Engineer

+977-9841033294 youtube.com/@CCC3sb santoshsbgk123@gmail.com github.com/0-BINARY-1

Objective

Good-natured, empathetic, crafty and diligent person with proven abilities in problem-solving, people management and motivation along with excellent practical and theoretical knowledge, seeking to join your team to help in enhancing company work , achieve company goals and push my abilities to higher level.

Education

- **Bachelors in Electronics, Communication and Information Engineering**
  Sagarmatha Engineering College
  2019 A. D – 2023 A. D
  Percentage = 67.61 %

- **High School (10 + 2) Science**
  Sainik Awasiya Mahavidyalaya
  2016 A. D – 2018 A. D
  GPA-11 = 3.39
  GPA-12 = 3.01
  CGPA = 3.21

- **Schooling (4 – 10)**
  Sainik Awasiya Mahavidyalaya
  2009 A. D – 2016 A. D
  SLC GPA = 3.50

Teaching & Training Experience

- **Teacher at National School of Science (NSS)**
  Working as a computer science teacher for science stream grade 11 and 12 at National School of Sciences (NSS), NIST located in Kathmandu from 2024-present date. I have been taking classes on web development, networking and C programming.

- **Part-time teacher at government school**
  From Aug 2025 – present date, I am working as a part-time computer science teacher for grade 10 students at Shanti Vidhya Griha (SVG), Kathmandu.

- **Home Tutor**
  I have taught subjects like Science, Mathematics, Computer Science to the students of class 8 to 12 during my free time after college hours and it has been two and half years since I started teaching as a home tutor for passive income.

- **Sagarmatha Techfest Hardware fellowship**
  From November 26 to 29 of 2023 A. D, I provided training to the students studying bachelor and college in different institute of Kathmandu. For these 4 days hardware fellowship program 60 students attended. I taught them about Arduino (microcontroller), different sensor i.e., DHT, IR, Ultrasonic, Bluetooth module, potentiometer analysis and programming using C and C++ through Arduino IDE.

- **One week teacher training program**
  In 2019 A. D, I helped as a team member for the teacher training program organized by Robotics Association of Nepal (RAN) at Kanjirowa National Higher Secondary School. In this program we trained teacher about how we can include technology to make studying creative and easier for student.

- **Techfest and Training Supervisor**
  Recently at NIST I along with my team supervised Techfest. Where above 30 colleges took part in competition like Prompt Battle, Ideathon, Free fire and MLBB. Last we conducted one month robotics and IoT related program.

Project

- **Detection of missing component in PCB using YOLO**
  As our major project we built a device which can detect fault in the Printed Circuit Boards (PCBs). Using Raspberry Pi 4 as a processor, camera and switches we successfully created this device and tested it. Our system provided 90 % accuracy for 8 tests out of 10.

- **COVID – 19 pandemic reduction system**
  As our minor project we built a system which can detect face mask, check body temperature, dispense sanitizer and finally open the door. Individual who is wearing mask, have normal body temperature and used sanitizer provided by the system were only allowed to enter the college premises.

- **Vehicle alert system**
  For techno-fest exhibition organized by Sagarmatha Engineering College we built a system which alert the vehicles if any other vehicle is coming from other side on the turning of the road or not and prevent fetal accidents.

- **Cozmo Clench**
  We built a 4 wheeled bot which can grab square box and place the box in respective place. It was manually controlled using wireless remote.

Awards/Honors

- **Ministry of Education, Science and Technology (MoEST)**
  Ministry of Education, Science and Technology organized a competition among students pursuing bachelor and master degree in various institutes from December 2022 A. D to March 2023 A. D. We were able to grab 1st position by building best STEM material for students of class 8, 9 and 10.

- **HackaDay (Hackathon 2022 A. D)**
  Computer engineering student society of Sagarmatha Engineering College organized a hackathon program named "HackaDay" on July 2022 A. D. We grabbed 2nd position by designing a game.

- **Himalayan Exhibition (HEx 2021 A. D)**
  Himalayan college of Engineering organized robo soccer competition in 2021 A. D. We were able to grab 2nd position in the competition.

- **Techfest IIT Bombay (2020 A. D)**
  After winning the Cozmo Clench 1st position in the competition organized by Advance Engineering College, we got the opportunity to participate at Cozmo Clench finals at IIT Bombay in January 2020 A. D.

- **COFAS International Computer Olympiad 2014, Lucknow**
  I participated in the "spell bee" competition of COFAS international computer Olympiad 2014 organized by City Montessori School, Lucknow.

- **Painting Competition (2015 A. D)**
  On the occasion of 50th Bagmati cleaning program April 2015 A.D, a painting competition was organized. In that competition I successfully grabbed 1st position and received prize from honorable President Bidya Devi Bhandari.

Research/Research Paper

Detection of missing components in PCB using YOLO

As a major project of my engineering course, me and my friends with group of 3 in total including me we did project on title "Detection of missing components in PCB using YOLO". We submitted our project's research document for International Journal on Engineering Technology (InJET) and got published on 2023 A.D.

Courses

- **Enterprise computing with AWS**
  Amazon Web Server (AWS)
- **SQL (Beginner and Intermediate)**
  Datacamp
- **Hypertext Markup Language (HTML)**
  W3School
- **Cisco Packet Tracer**
  Cisco Network Academy
- **Python**
  Datacamp

Skills

Programming:

- Assembly Language (8085, 8086)
- C
- C++
- Python
- SQL
- HTML

Computer Technology:

- Networking
- Web Technology
- Multimedia
- Database system
- Internet of Things (IoT)

Graphics Designing:

- Adobe Photoshop
- Blender
- SolidWorks

Languages

- Nepali (fluent)
- English (fluent)
- Hindi (fluent)
